**Environment Department Advises “BOIL WATER ORDER” for
Village of Guadalupita**

(Santa Fe, NM) –The New Mexico Environment Department’s (NMED) Drinking Water Bureau has advised the Village of Guadalupita to issue a “boil water order” for its consumers.

The Village of Guadalupita, a mutal domestic water system serving approximately 130 consumers in Mora County, located approximately 15 miles north of Mora, was put on a “boil water advisory” on October 23, 2003 due to bacteriological contamination that exceeded the Maximum Contaminant Level (MCL) for *E.coli*. NMED requires that the system owner/operator notify all customers served by that system of this finding.

Consumers of the Village Guadalupita water system are advised to boil water for five minutes before drinking, cooking, and dishwashing.

The presence of *E. coli* in water indicates that the water may have been in contact with sewage or animal wastes, and could contain disease-causing organisms. Most strains of *E. coli* are harmless and live in the intestines of healthy humans and animals. However, a positive test for *E. coli* in the drinking water supply may indicate the presence of dangerous strains of *E. coli* or other disease-causing organisms, which are sometimes found in sewage or animal wastes. These types of organisms may cause severe gastrointestinal illness and, in rare cases, even death. Children, the elderly, and immuno-compromised individuals are at an increased risk for illness.

Actions have been initiated to disinfect the water system and identify possible sources of contamination. In addition, the Drinking Water Bureau will continue to assist with trouble-shooting to identify the source of the problem.

The New Mexico Department of Health has also been notified and will remain on alert for any health effects linked to this water quality issue. Consumers of the water system may call (505) 476-3572, if they have any water-related health concerns.

For more information contact Chris Serazio, Env. Specialist, NMED, at (505) 827-1400 x.1031 or Jon Goldstein, Communications Director, NMED at (505) 827-0314.
